

Extreme Engineering Ltd. Safety, Health and Environmental Policy Statement

Extreme Engineering Ltd. is dedicated to protecting all of its employees, clients, property, the environment and the public in its day to day operations and business by the enforcement of its Safety Program.

To ensure a safe and healthy work environment, it is the direct responsibility of Management, Supervisors, Employees, and Contractors to participate in the Company's goals towards safety.

It is Managements' responsibility to provide and make available the Company's Safety Manual, training to all of its Employees and regularly scheduled safety meetings. It is the Supervisors' responsibility to identify safety needs, communicate safety hazards, investigate hazardous conditions, provide training and ensure all equipment is properly maintained.

The employees shall comply with all safety rules, following recommended safe work practices, wear and use of PPE (Personal Protective Equipment) when required, and participate in safety programs. The employees shall communicate their concerns and issues to their Supervisors and or Management .

The goals of Extreme Engineering Ltd. are to achieve an accident free workplace by complying with all government regulatory requirements.
