

# Do You Want to Reduce the Cost of Drilling Your Wellbores?

---

## DRILLING IS ABOUT INFORMATION.

Today's market demands that you control your drilling costs. You're under pressure to reduce your non-productive time and do this with less people. To do this you need information. Better information. And more of it.

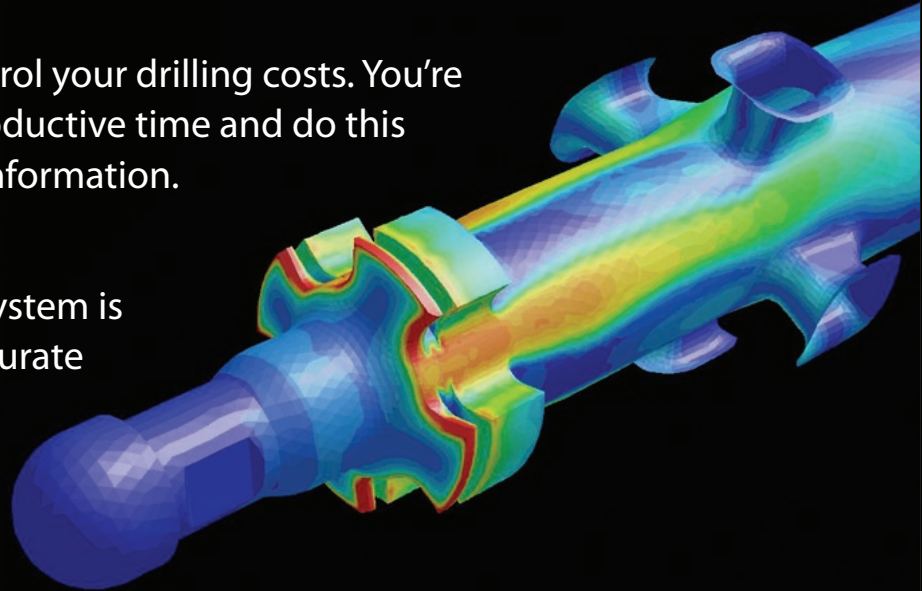

The XPulse™ Survey on Connection™ system is equipped to automatically provide accurate inclination and azimuth information when you need it most: every time you make a connection.

We didn't stop there. XPulse™ is also equipped with Passive MWD™ toolfacing technology. With one tool you get the correct sub-surface parameters that let you act on the information. After all it's your well.

Why not use **the best in Wellbore Monitoring Systems** for your coiled tubing or jointed pipe applications? XPulse™ will help you **hit your target depth quicker, more accurately, and at a reduced cost.**

Find out why Survey On Connection™ is **the most advanced unmanned wellbore monitoring system on the market.** Get XPulse in your BHA today and reduce your costs.
